DETAILED ACTION

The Restriction Requirement of Paper No. 3, 4/5/2001, has been withdrawn. A new Restriction Requirement is set forth below. The Examiner regrets the inconvenience.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 18-~~21~~²⁰, drawn to a method for treating as viral infection by administration of TNF receptor and DHEA, classified in class 514, subclass 2.
- II. Claims 21-29, drawn to a method of treating autoimmune and inflammatory diseases by administration of TNF receptor and DHEA, classified in class 514, subclass 2.

The inventions are distinct, each from the other, for the following reasons:

Inventions I and II are independent and distinct, each from the other, because the methods are directed to treating distinct pathological conditions which differ in etiologies and therapeutic endpoints.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of Inventions I and II: the method is practiced with TNF Binding Protein-1, or TNF Binding Protein-2, or one of the proteins encompassed by the term "TNF receptor". The proteins differ with respect to their structure, and a person of ordinary skill in the art would not envision one in

view of the other. Therefore methods of using them appear to be separate and patentably distinct species in view of each other.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 18 and 21 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1646

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
